Hello. Today you will watch this video which is very short but contains all the information that you need to answer the following questions.

An ecosystem is made of two primary things,

These are examples of biotics, provide 4.

These are examples of abiotics. Provide 3

Make your own chain of events based on what it is said about how the sunlight is used by producers. Describe the cycle of the video.

What is a habitat according to the video and what does it provide to the living things there?

If you want to learn a bit more about ecosystems you can also watch this other video. <https://www.youtube.com/watch?v=bJEToQ49Yjc>
